COLOR RIBBON DMX CONTROL

The Color Ribbon DMX Controller can directly control and power a Color Ribbon series fixtures. The unit will output 3 channels of constant current PWM driving signal. Via DMX console you can control 3 channels of 256 levels. The unit also has built in pre stored effects that are accessible via the dip switches.

COLOR RIBBON REPEATER

Specially designed to work with our Ribbon series fixtures. Expands power output allowing you to add more fixtures to the same control chain. In theory Power extender can be added unlimitedly to add more Ribbons Fixtures.

RIBBON POWER SUPPLY

Color Ribbon Power Supply are used to provide power to the Color Ribbon DMX Controller and the Color Ribbon Repeater.
