RIBBON DMX CONTROL

Directly control and powers the CW Ribbon fixtures. The unit will output 3 channels of constant current PWM driving signal. Via DMX console you can control 3 channels of 256 levels. The unit also has built in pre stored effects that are accessible via the dip switches.

RIBBON REPEATER

Specially designed to work with our Ribbon series fixtures. Expands power output allowing you to add more fixtures to the same control chain. In theory Power extender can be added unlimitedly to add more Ribbons Fixtures.

RIBBON POWER SUPPLY

used to provide power to the Ribbon DMX Controller and the Ribbon Repeater. It can also be used to provide direct power to the CW Ribbon. Limited to 16' 4" of LEDs.
